What type of communication is available/desireable?

Unsure what if any graphing options are appropriate here.

Clicking on a row opens the Patient tab with that patient's info.

PHQ-9: Mis = Missing (incomplete or refused to take test during session)

Hovering over text string with an ellipsis displays full text in tooltip box.

Questions:

Is there a need to act simultaneously on multiple patients, so providing a means to select more than one and controls to manage the selection?

What type of communication is available/desireable?

Sessions/Wk: Unsure how this metric should be graded.

Enable data entry into today's session fields via tabbing and keyboard input.

Hovering over text string with an ellipsis displays full text in tooltip box.

NA = Not Applicable to scheduled session due to cancellation or no-show.

= Displays details about location of session.

"See More" button displays all earlier appointment rows. How many should display by default? Toggles between:

See Less

Should Appointment History and PHQ-9 History zones appear open by default on initial display of this tab? Should others?

Should graph updating occur automatically following data entry or is it a manual process (ie, requiring a dedicated "Update" button)?

Unsure how the individual PHQ-9 question scores would get entered.

Title, content and arrangement of these accordion zones TBD.

Questions:

On what screen(s) and in what manner should interactive decision support input be enacted (ie, based on a patient's current status, and given these recommendations, choose what modified course of action if any you want to take)?

What specifically are the dimensions of required clinical support?

- psychotherapy treatments
- homework assignments
- medications
- session scheduling
- ???

Consider displaying one or more “generic” or pre-configured custom graphical displays of data for the patient currently selected in the Patient tab when navigating from the Patient tab to the Patient Populations tab.

“Patient Populations” may not be the best term for the title of this dashboard display:
Data Insights/Analysis/Assessor
Graphical Comparator
Decision Support Analysis

- Is Search function applicable here?
- Control zone contains graphing parameters, variables, display options, data management controls.
- Graphing-specific controls disable when data table display is selected.
- “Update Graph” button enables following data modification. (Should updating be automatic?)
- Hamburger menu options:
 - Delete
 - Save as...
 - Overlay on Graph...
 - Rename Graph...
- Clicking on a graph highlights it (title bar and/or frame) and displays its settings in control zone at top.
- Is manual resizing capability necessary?
- Is manual rearranging capability necessary?
- Drag-and-drop one graph onto another?
